

Captura del código fuente

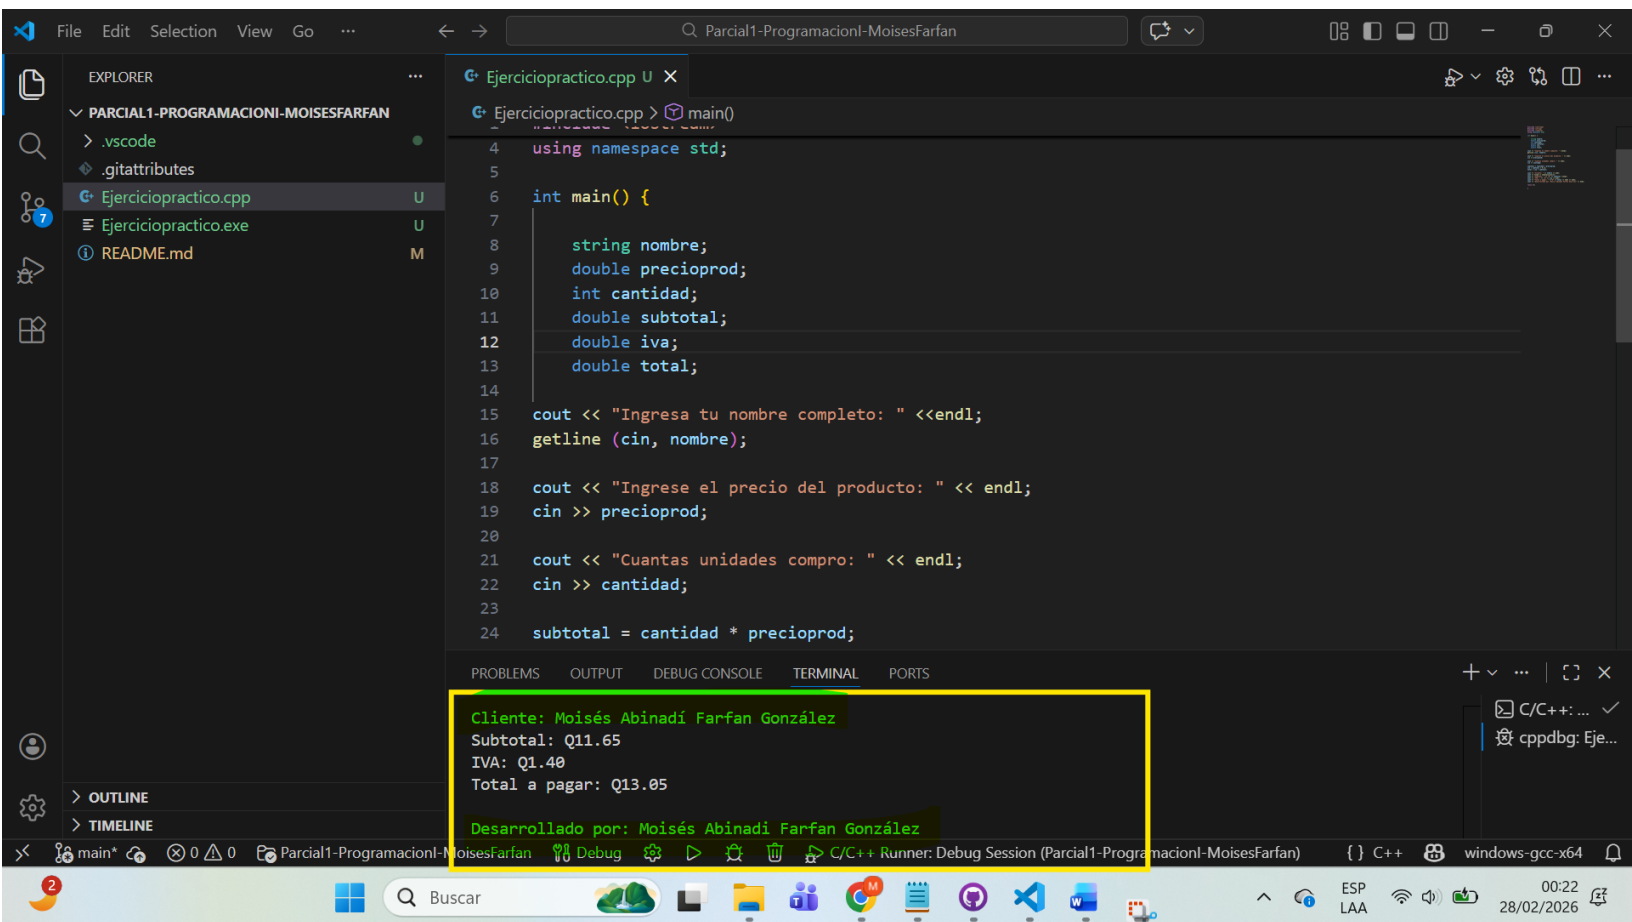

The image shows a Visual Studio Code editor window with a C++ file named `Ejerciciopractico.cpp` open. The Explorer sidebar on the left shows the project structure for `PARCIAL1-PROGRAMACIONI-MOISESFARFAN`, including `.vscode`, `.gitattributes`, `Ejerciciopractico.cpp`, `Ejerciciopractico.exe`, and `README.md`. The main editor area displays the source code of the program, which calculates the subtotal, IVA (12%), and total for a product based on user input for name, price, and quantity. The code uses `cout` and `getline` for output and input, and `fixed` and `setprecision` for formatted output. The status bar at the bottom indicates the current session is a C/C++ Runner: Debug Session.

```
1  #include <iostream>
2  #include <string>
3  #include <iomanip>
4  using namespace std;
5
6  int main() {
7
8      string nombre;
9      double precioproducto;
10     int cantidad;
11     double subtotal;
12     double iva;
13     double total;
14
15     cout << "Ingresa tu nombre completo: " << endl;
16     getline (cin, nombre);
17
18     cout << "Ingresa el precio del producto: " << endl;
19     cin >> precioproducto;
20
21     cout << "Cuantas unidades compro: " << endl;
22     cin >> cantidad;
23
24     subtotal = cantidad * precioproducto;
25     iva = subtotal * 0.12;
26     total = iva + subtotal;
27
28     cout << "Cliente: " << nombre << endl;
29     cout << fixed << setprecision(2);
30     cout << "Subtotal: " << "Q" << subtotal << endl;
31     cout << "IVA: " << "Q" << iva << endl;
32     cout << "Total a pagar: " << "Q" << total << endl << endl;
33     cout << "Desarrollado por: Moisés Abinadi Farfan González" << endl;
34
35     return 0;
36 }
37
```

Captura del programa en ejecución

Captura en la salida del programa en cuadro amarillo y se resalta en color verde el nombre del estudiante quien realizo el programa.

The image shows a Visual Studio Code editor window with a C++ project named "PARCIAL1-PROGRAMACIONI-MOISESFARFAN". The file explorer on the left shows the project structure, including a file named "Ejerciciopractico.cpp". The editor window displays the source code of this file, which is a simple C++ program that prompts the user for their name, the price of a product, and the quantity purchased, then calculates the subtotal, IVA, and total amount to be paid.

```
1 // Ejerciciopractico.cpp
2 //
3 //
4 using namespace std;
5
6 int main() {
7
8     string nombre;
9     double precioproducto;
10    int cantidad;
11    double subtotal;
12    double iva;
13    double total;
14
15    cout << "Ingresa tu nombre completo: " << endl;
16    getline (cin, nombre);
17
18    cout << "Ingresa el precio del producto: " << endl;
19    cin >> precioproducto;
20
21    cout << "Cuantas unidades compro: " << endl;
22    cin >> cantidad;
23
24    subtotal = cantidad * precioproducto;
```

The terminal window at the bottom shows the output of the program, which is a yellow box in the original image. The output displays the name of the student, the subtotal, the IVA, and the total amount to be paid, all in green text.

```
Cliente: Moisés Abinadi Farfan González
Subtotal: Q11.65
IVA: Q1.40
Total a pagar: Q13.05

Desarrollado por: Moisés Abinadi Farfan González
